

## Fantuzzi Parts

The Fantuzzi Group of Companies offers a plethora of material handling equipment and heavy machinery. The fleet consists of a plethora of equipment focused on loading, unloading and transporting goods. The railway freight industry and the port market need a big portion of their equipment.

Initially beginning in the 1960s as a zoo-technical and agricultural equipment manufacturer in the province of Reggio Emilia, Fantuzzi has grown to become a world leader in the heavy equipment industry. Now a multinational company, the company gradually expanded after welcoming successful advancements and overcoming a large number of technological challenges. Luciano Fantuzzi is the President and founder of the group. In 1967, the group started making side lift trucks specifically for hauling timber and extended materials such as metal rods that weighed between three to 5 tonnes. The firm enjoyed frequent orders and completed 60 units in the 2nd; which was five times greater than their first year sales.

Within a short time, the firm took off exponentially. In 1968, a heavy-duty side-loader British model that was capable of lifting up to 32 tonnes inspired Luciano Fantuzzi. He wanted to create something that had more power with a similar style. After completing this machine and reaching his goal, Luciano began accepting orders from French Railways, Fiat and many others. Nowadays, the Fantuzzi Group Italy has a large number of manufacturing plants throughout the world including Italy, Germany and China. The company proudly exports to 162 countries.

Fantuzzi has kindly offered its patented expertise with governments all around the globe with the goal of making the material handling, heavy equipment and transportation industries more convenient. Advancements and digital technology are helping to transform the industry.
