

Aerial Lift Train the Trainer Mesa

Aerial Lift Train the Trainer Mesa - The Aerial Lifts Train the Trainer Certification Program teaches trainers how to efficiently train operators in safe industrial mobile machine operation. Trainers are given in-depth instruction on aerial lift equipment. The program is offered on an open enrollment basis and delivered at selected training places. Prior to certification, trainers are evaluated and scored on their demonstrated skills and knowledge.

The Aerial Lifts Train the Trainer Certification Program focuses on practical learning and as the top training provider in the industry, we provide top notch hands-on training. We provide plenty of chances to practice the concepts and techniques which are learned within the classroom. Along with hands-on experience, trainers develop general understanding of instructional techniques and machinery theory, field and classroom communication skills, and ability to successfully train and evaluate operators. Trainers will gain an understanding of what traits make an effective trainer.

The Aerial Lifts Train the Trainer Program also teaches the correct techniques required to be able to express the right information within the classroom and field setting. There are three factors of machine operation which the trainer must learn how to convey to operators: what to perform; how to do it; and the reason why it needs to be carried out.

In the program, trainers would be given the latest, detailed reference material to better help them convey the information to machine operators. The manuals utilized, contain detailed information about all aspects of industrial mobile equipment operator training. Incorporated within the package are training aids which provide a visual reference to improve the learning experience. The equipment-specific training products include necessary materials for both the trainer and the operator: videos/DVD's, overhead transparencies, safety message posters, kinds of equipment; stability pyramids and digital training aids.
