

Order Picker License Mesa

Order Picker License Mesa - Order preparation operation or also called order picking as it is more normally known is a process used within warehouse operations and comprises workers referred to as order pickers. The order picker's duty is to take and collect articles in certain quantities to be able to accomplish the client's orders before shipment. Order picking is an easy warehousing method. The effectiveness in which this task is accomplished can be directly connected to the productivity of a supply chain. Therefore, order picking is amongst the most controlled logistic processes. Order picking falls in the category of the warehouse management system.

There are some specific kinds of order picking. The main kinds comprise: wave picking method, pick to box method, picker to part method or piece picking, zone picking method and sorting systems method.

The pick to box method comprises the order picker filling the box with the things from his or her station. The box then moves to other picking locations until the client order is complete. In this particular method, there is no movement of the order picker employees. In the wave picking method, the order pickers move around to be able to collect the necessary things for several orders. The piece picking or picker to part method is similar where the order picker or pickers move to collect the items required but for one order only.

There is no movement by the order picker in the sorting systems method. Rather, things are delivered to the orderpicker by an automatic system like for example a conveyor system or an automatic storage system. In the zone picking method, each and every order picker is assigned to one particular area. They are responsible for just realizing order picking in this specific area.
