

Clark Forklift

Currently, there are over 350,000 Clark forklifts performing worldwide, and in excess of 250,000 in use in North America alone. With five major lines across the globe, Clark is proud to be one of the most expansive organizations in the industry. Heavy duty vehicles ranging from 1,500lb to 18,000lb capacities, dual fuel, petrol, LPG, hand-driven lift trucks, narrow-aisle stackers and electric riders are a few of their specialties.

Clark Totalift has 20 exclusive makes of forklifts, with components covering more than 120,000 specific items for all of its automated equipment. Your local Clark Dealer is your complete source for availability of all your components needs offered by Clark Totalift.

Clark's phenomenal Parts Distribution Facilities are conveniently located in Louisville, Kentucky, which serves both their clients and dealers in North America, and Changwon, South Korea, which handles their Asian sellers and customers. For over 90 years, Clark has exceeded industry standards, being one of the most actively advancing manufacturers. Driven to provide the highest level of value and service to our clients, Clark remains on the cutting edge when it comes to improving efficiency and benefiting performance.

Globally, Clark has one of the most amazing dealer support networks. With over 550 locations worldwide, seller representation in over 80 nations and 230 locations in North America, their high level of dedication to their customers predominates the materials handling industry.

Clark proudly remains an innovative leader of the industrial equipment industry, revolutionizing safety features such as the worker restraint system. This exceptional dedication to safety is now a customary feature on every forklift.

Clark has a uncompromising goal to have the No. 1 quality system in the industry which is demonstrated by their commitment to ISO standards. Clark, is the first manufacturer of forklifts and lift trucks to be globally certified with quality standard ISO 9001 in all of its production facilities. Additionally, the ISO 14001 Environmental Management System certificate was awarded to Clark's Korean facility in 2001. This paramount achievement permits Clark to be prepared for any number of environmental restrictions, thus placing them in a dominant market position.

Lean Production

Clark has selected the system of "Lean Manufacturing" at all of its assembly facilities because this technique is extremely economical and permits minimal use of resources. Developed to guarantee maximum proficiency, this system is designed to find and acknowledge the most effective methods for manufacturing plant stewardship. Clark has concluded this transition of its Korean plant. COPS which is Clark Optimized Production System, similarly focuses on quality of product and services and manufacturing efficiencies.

Engineering

Clark's product engineers and suppliers communicate together to enhance the proficiency and brilliance of their merchandise while minimizing costs. The contemporary value engineering agenda combines modern product development and delivers improved consumer support and service within the industry.
